A versatile Frontend Developer with 6 months of hands-on experience, specializing in building responsive and user-friendly web applications. Proficient in modern frontend technologies including React, Next.js, TypeScript, CSS, and Firebase. Passionate about crafting scalable, efficient, and clean user interfaces.

Professional Experience

Skinstric AI Virtual Internship

Remote | August 2026 - September 2026

Frontend Engineer

- Created a real-time skin analysis platform using Skinstric AI API and Next.js, that gives an AI estimate of the user's gender, age, and race.
- Developed responsive UI with using best HTML, CSS, and JavaScript practices, ensuring the best overall code quality
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis
- Hosted the website using Vercel providing 99.9% guaranteed uptime.

Frontend Simplified Virtual Internship

Remote | July 2026 - August 2026

Frontend Developer

- Developed 15 + responsive, reusable React.js frontend components for an NFT display platform using JavaScript ES6+, Owl Carousel, and Animate on Scroll for a clean, modern design.
- Integrated REST APIs using Axios to retrieve NFT metadata and digital assets, achieving 95% successful request rate and sub 2-second load times.
- Implemented mobile-responsive layouts using CSS Flexbox and Grid, creating consistent display across all screen sizes with 98% compatibility.
- Utilized Github pull requests to work on individual components independently and then combine them all into the final product.

Projects (personal)

Flickbase Movie Search: flickbase-react.vercel.app/ | github.com/jpoellot1/Flickbase-react

Created a fully functional search platform for movies

- Designed & created a search api for movies with a fully responsive design, loading states & dynamic routing to showcase the most popular movies on a mass level search and provide dedicated individual movie pages.

Cryptoplace Clone: cryptoplace-omega-five.vercel.app | github.com/jpoellot1/Cryptoplace

Created a cryptocurrency search platform

- Engineered & integrated a fully responsive search API for cryptocurrency assets, featuring real-time loading states and dynamic routing to enable mass-market token discovery alongside dedicated individual asset pages.

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, TailwindCSS, Firebase, NextJS, Redux

Tools & Other platforms: Vercel, GitHub, Vite, Figma, VsCode, Stripe

Education:

Frontend Simplified | [Certificate](#)

April 2026 - September 2026

Degrees: Bachelor of Science in Business Administration, Morningside University

May 2008

Other

Interests: I enjoy watching and playing sports, travelling with my family, and playing video games
